

LINE HEALTH RECORDER (LHR)

The Line Health Recorder (LHR) retrieves the status from GSX/GSR recorders via radio with no user interface, allowing for efficient quality control of the spread without assigning dedicated personnel for this operation.

When connected to a computer via a USB cable, the LHR will appear as a removable USB memory device where configuration files and software updates can be uploaded.

Status data may be downloaded from the LHR through the USB cable, or in Bluetooth mode for viewing on a phone or tablet running Android mobile OS.

The LHR can operate 12–14 hours on a fully charged battery, which can be replaced in the field if longer operation is required.

LHR

Features:

- Micro-USB port for uploading, downloading data and charging battery.
- 4 LEDs show radio transmission, reception of status, health of USB connection, and charging process.
- Removable battery (Lithium Ion 3.7 Volts 1000 mAH).
- RF transceiver module.
- Removable 16 GB microSDHC flash memory.

Physical Dimensions:

- 3.3 x 2.0 x 0.6 inches (8.5 x 5.2 x 1.5 centimeters)
