Battery Management System

- Compatible with all Geospace battery types, plus supported competitors’ battery types
- Shows charging progress both numerically and graphically
- Retrofit existing charging racks
- Tracks individual battery units’ health & status by serial number
- Keeps a database of battery history
- Performs battery capacity test

Battery Tray containing BN6, BN10, and BN25 batteries.
Recognizes all Geospace battery types, plus supported competitors’ battery types

Charge to 30% for shipping, 60% for storage, or 100% for deployment

Measured battery voltage

Shows progress numerically & graphically

Capacity Test plus recharge to 30%, 60%, or 100%

Charge to 30% for shipping, 60% for storage, or 100% for deployment
